

Columbus Metropolitan Library

Purpose

Columbus Metropolitan Library's 23 locations lead the way in providing information resources to central Ohio.

In 2014 we loaned over 17.1 million items to 5.7 million visitors, with another 9.2 million visits to our website, making the library available to all 24/7.

Impact

We serve the Ohio State community:

Our mini-branch in the Thompson Library provides students with access to our collection.

Online services provide students with access to magazines, movies, music, eBooks and audiobooks that can be downloaded to electronic devices from anywhere.

Our branches provide opportunities for students studying math, science, social work, or education and learning to volunteer and to get to know the central Ohio community and the populations we serve.

We offer opportunities to fill service learning needs, and provide opportunities to access professional experience before graduation by partnering with library staff.
